

**Ms. Fallner** studied the laws and works since 2008 as patent manager of Heidelberg University. IP clauses of all industry cooperation agreements, industry-on-campus cooperations and contract research agreements are checked and where necessary negotiated by the patent management of Heidelberg University. Also license agreements or assignments on IP with startups, SMEs or global players are an important part of her business. She deals with round about 150 pending patent families and 50 invention disclosures each year (without the faculty of medicine Heidelberg, which deals with its own tech transfer office).
